CAREER FOCUS: Business / Data Analyst Intern
Computer Science student at Oakland University with a background in Computer Information Systems from Oakland Community College and experience in programming, problem-solving, and technical documentation. Skilled in analytical thinking, communication, and explaining technical concepts in simple terms. Seeking a Business Analyst Intern position to apply technical skills to data analysis, process improvement, and business problem-solving.

Education:

Bachelor of Science, Computer Science — Expected Graduation January 2028
Oakland University, Rochester, MI

Associate Degree, Computer Information System — Graduated *May 2026*
Oakland Community College, MI

Engineering Course Projects:

JobTracker Web Application

- Built a website to help users track and manage job applications, including application status, interview progress, waiting for results, and rejected applications. Used **HTML, CSS, and JavaScript** to create the website interface and interactive features, with the goal of making job searching more organized and easier to manage.

Weather Forecast Website

- Created a weather forecast website using **HTML, CSS, and JavaScript** to display weather information in an easy-to-read format. Designed the webpage layout and implemented JavaScript functionality to make the site interactive and useful for checking weather conditions.

Starbucks Sales Data Analysis

- Used **Microsoft Excel** to analyze real-world Starbucks sales data from Michigan, examining revenue and product sales such as cappuccinos and Pumpkin Spice Lattes. Organized and analyzed the data to identify sales patterns and estimate daily product sales.

Relevant Experience:

Manger and Waiter — March 2025 - present
Pho Chopstix, Southfield, MI

- Process orders through the restaurant's **POS/order management system** and communicate orders with kitchen staff.
- Provide customer service to a diverse range of customers, answer questions, handle requests, and resolve issues professionally.
- Developed strong **communication, teamwork, time management, problem-solving, and customer service skills** through daily interactions with customers and coworkers.

Technical Skills:

Programming Languages: Java, Python, Javascript, HTML/CSS, SQL
Software Applications: Microsoft Office, Excel, Visual Studio Code, GitHub, Overleaf, Docker
Operating Systems: Windows 11
